Profile

As a dynamic Software Engineer with a Master of Science degree from Edinburgh University, I am seeking a position that would allow me to invest myself in challenging projects. Working in a team environment, on a project that will allow me to expand my technological knowledge, is the prospect that motivates me most strongly.

Education

- 2008-2009 *University of Edinburgh, Edinburgh, United Kingdom*
MSc Computer Science, “Computer System & Software Engineering”
- 2006-2008 *Napier University, Edinburgh, United Kingdom*
BEng with Honours “Software Engineering” (2.1)
- 2004-2006 *IUT du Limousin, Limoges, France*
DUT in Computer Science, option Software Engineering
- 2003-2004 *Lycée Henri Brisson, Vierzon, France*
CPGE Physics, Technology & Engineering
- 2000-2003 *Lycée Jean Giraudoux, Châteauroux, France*
“Baccalauréat Scientifique”, option mathematics, with honours

Experience

Related experience

Sept. 2009 – Present • *Sun Microsystems, Linlithgow, UK* • *Support Engineer Tier 2*

- Management and monitoring of critical systems installed at major companies
- Analysis of hardware and software issues for problem remediation
- Working with Sun Microsystems’ world-class server technologies.

Oct. 2007 – Sept. 2009 • *C&IT – Napier University, Edinburgh, UK* • *Student Helper*

- Front-line support in a lab of 500 computers
- Helping users face to face in the labs but also answering and helping them over the phone
- Logging calls and maintaining the equipment
- Extra responsibilities on Sundays for the support of the entire university

April to June 2006 • *OSKER Oklahoma University, USA* • *Intern*

- Intern at OSKER (Oklahoma Super Computing Center for Education and Research)
- Working on a super-computer (66th most powerful in 2006)
- Parallelizing an important piece of software (petrol presence testing)

October 2005 to April 2006 • Université de Limoges, FR • Project leader

- Management of a small team of 6 programmers, time and activities management (design and implementation of the program + documentation),
- Responsible for the interactions with the client
- Long and successful project with real client ('La Fondation du Patrimoine')

Other experience

July and August 2008 • Napier University, Edinburgh, UK • Clearing Operator

- Answering student calls and processing their queries concerning admissions at Napier University
- Making offers to students on the phone for the university administration
- Processing various paper works regarding the student applications

Summer 2006 and 2007 • Seron Meuble, Châteauroux, France • Receptionist and Cashier

- Employed in an up-market furniture shop
- Main role was customer service
- Responsible for the till and handling of phones
- Drawing up loans with customers, completing paperwork

Computing skills

- **Operating systems:** Unix, Solaris, Microsoft Windows
- **Software Programming:** Java, C/C++, VB.NET, C#, Fortran, Cobol
- **Web Programming:** Php, Html, CSS, JavaScript, Ajax
- **Database:** SQL language, MySQL, Microsoft SQL Server & Access
- **Software Engineering:** UML, Design Patterns, Soft. Metrics, Soft. Testing (incl. JUnit)
- **Network:** Notions of Routers Configuration, Snort, Authentication, Encryption, etc.
- **APIs:** Google Map API, Facebook API
- **Software:** Eclipse, NetBeans, Visual Studio .NET, MS Project, Photoshop, etc.
- **Particular Knowledge:** Parallel Architecture and Algorithms, Software Project Management, Real Time Software Engineering, Entrepreneurship basis

Interests

- **Music:** Studied the trombone for 8 years in a National Music School in France, involved in several orchestra and bands.
- **Rock climbing:** Practice in a club for 2 years (Limoges, FR) and as leisure since that.
- As secondary leisure: **Photography, Golf and Badminton**
